

PPLYTX

We know that collating diversity and inclusion data can be a real challenge, which is why PPLYTX has been created.

What is PPLYTX?

The only system you need to help you report and analyse your people-centric data. PPLYTX automates your diversity reporting, allowing you to easily measure and evaluate the impact diversity and inclusion outcomes have on your business.

Composition

Pay Equity

Performance

Why PPLYTX?

Make your diversity reporting simple, accurate and revealing by automating it. Get immediate diversity insights from your data in under 60 seconds. The PPLYTX dashboards provide simple reports displaying workforce composition, pay equity status and, performance outcomes.

Let your composition, remuneration and performance data work harder for you to properly inform your diversity and inclusion strategy.

PPLYTX can:

- Automates your gender pay reports
- breaks down your gender composition
- Improves overall performance

Filter your report by:

Location

Business Unit

Team

Gender

Job Level

Age

Tenure

FAQs

How Often Should We Upload Data?

You have the choice of uploading data either monthly or quarterly. Simply add your data to the CSV file and click the 'upload' button. Within seconds, your report is ready.

Who Can Access The Data?

We have included permission levels so that, you can grant business leaders, executive, D&I and others access to the data. You can choose to give them full access to everything, turn on/off team data, and also limit their view by turning off any pay equity outcomes.

We know that data can be sensitive, so it's important that you're in control of it. You choose who sees it.

How Many Levels In The Organisation Can Be Measured?

We measure three levels down in the organisation, which means that you get to view the ensure company data and two additional levels. We'll help you set this up right from the start.
